

Readme file for compiling code:

This assignment was made using Python 3.x

Steps for compiling:

1> Open python command line interface at the location where the python file (name: decisiontree.py), included in this project, is located.

2> Please type the following commands, make sure to provide the full paths and L, K values in double quotes:

```
python decisiontree.py <L> <K> <full path of training set csv file> <full path of testing set csv file> <full path of validation set csv file> <yes/no>
```

Eg: >>> python decisiontree.py "10" "3" "/Users/Sachuleonid/Downloads/data_sets2/training_set.csv" "/Users/Sachuleonid/Downloads/data_sets2/test_set.csv" "/Users/Sachuleonid/Downloads/data_sets2/validation_set.csv" "yes"

3> Please give it some time to print the tree and stats
